	SCALE: 1:1	SHEET 1 OF 7

B

B

Optional. These dowel pin holes can be pre-drilled out in a drill press with a 5/32in. (3.97mm) drill bit for an easier press fit.

CFP-03
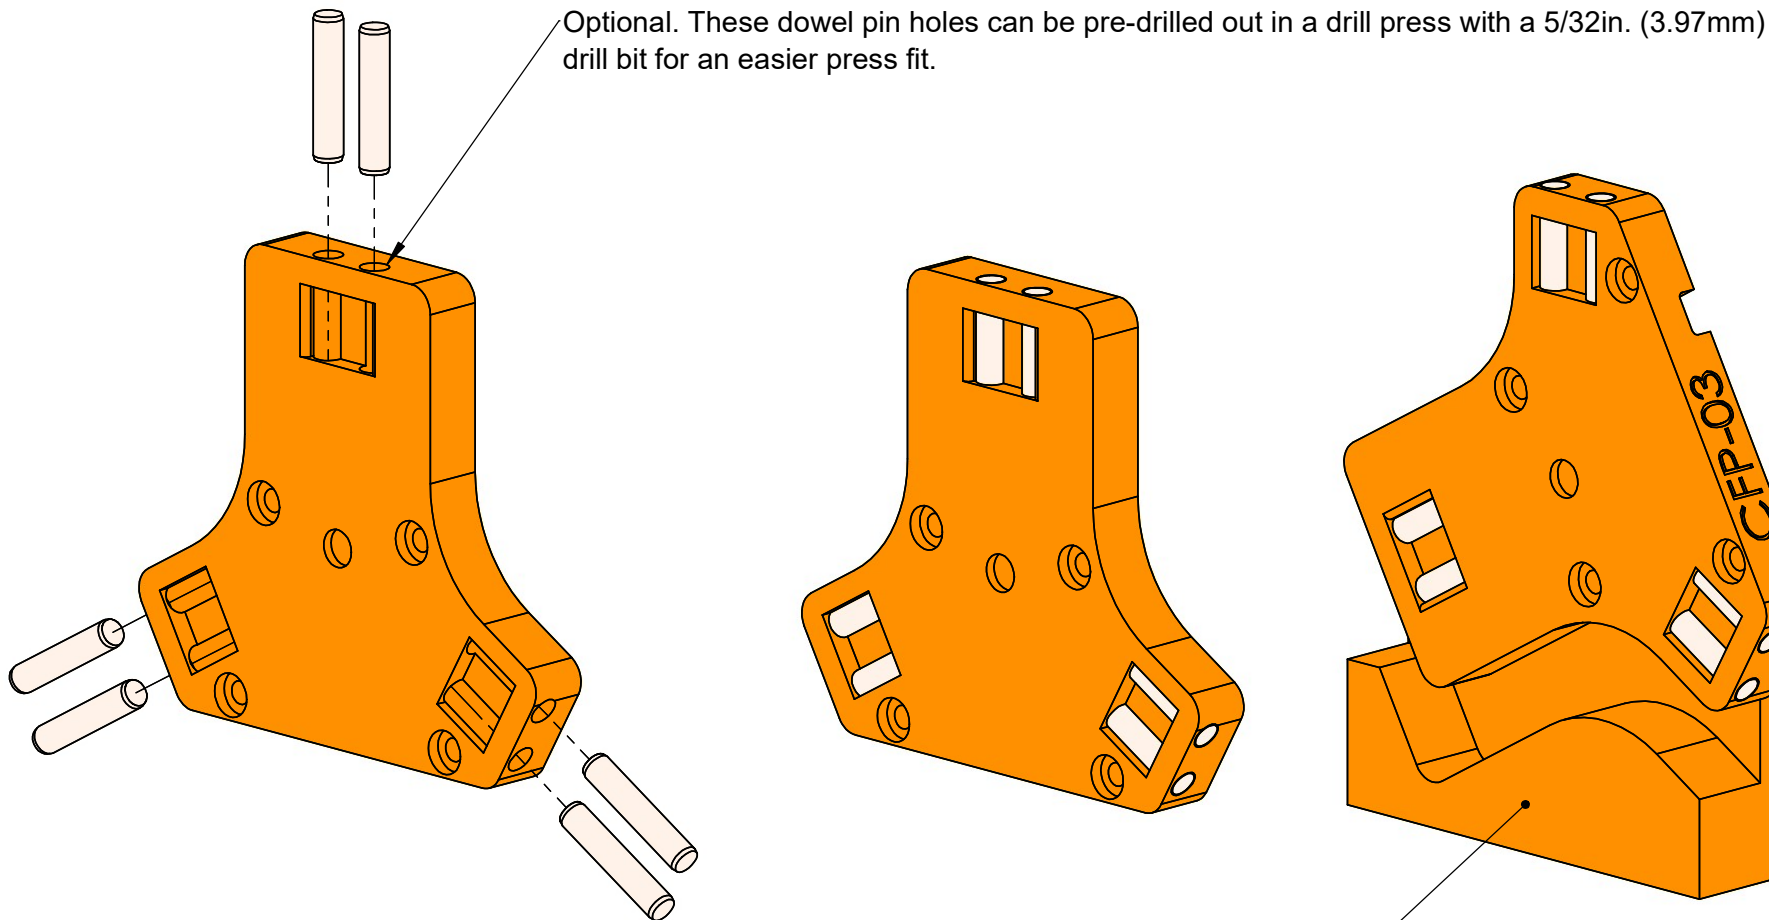

Press-fit each dowel pin into each socket until it is flush with the surface.

Use the pin insertion fixture to hold the Carriage Front Plate at the right angle for pin insertion.

B

B

Step 1: Press-fit the square nut such that it is flush with the top face.

Note that the outer square nut will have a slightly looser fit.

Step 2: Loosely install both screw components such that they engage the threads. The set screw should not peek out into the center hole. The buttonhead screw will be tightened later.
